VERIFIABLE SCIENCE

UltraDetox10-Day Pure Pack is designed to promote liver and G.I. health and function, normal detoxification processes for common, mild environmental heavy metal exposure. It also moderates the effects of environmental estrogens with a comprehensive profile of bioavailable vitamins, chelated minerals, and other ingredients. The pack includes vitamins, minerals, amino acids, glutathione, broccoli sprout and herbal extracts to promote phase I and phase II detoxification.^{1,2} B vitamins, taurine, curcumin and artichoke support healthy gene expression and bile flow to promote healthy fat metabolism in the liver.³⁻⁶ It also includes antioxidants, glutathione, milk thistle and curcumin to support liver tissue health.^{7,8} Glutamine and chlorella are included to support G.I. cell health and integrity.⁹ Chlorella and zinc also regulate exposure and tissue distribution of common mild, environmental heavy metal intake.^{10,11} Alpha lipoic acid, NAC and selenium promote glutathione and antioxidant protection.¹²⁻¹⁴ BioResponse DIM[®] supports hormonal detoxification and helps to balance the 2-hydroxylation: 16-hydroxylation pathway metabolite ratio.¹⁵ Sulforaphane, taurine, glycine and NAC promote healthy phase II detoxification through the glucuronidation and sulfation pathways.^{16†}
